Work Experience:

Grupo SN

Hybrid

Senior Full Stack Developer

Abril 2024 - now

- Created a chatbot system integrated with AI to filter and assist potential clients interested in purchasing an apartment. Data 100% integrated with the CRM.
- Developed a Python-based automation for a truck weighing system, detecting correct vehicle positioning on the scale and integrating with the billing system, which drastically reduced weighing errors and ensured accurate invoicing with real-time alerts
- Built a Flutter app for a construction company that streamlined client access to condominium information and simplified financial management processes, reducing WhatsApp invoice requests by more than 50%.

Delta Global

Hybrid

Mid-Level Full Stack Developer

May 2023 - Abril 2024

- Led all of the company's API integrations, taking on the role just 3 months after joining. Achieved seamless API integrations with major clients such as Hyundai, ensuring reliability and efficiency.
- Improved the company's logging system with Elasticsearch, achieving a 200% increase in log query speed and overall system efficiency.
- Promoted to Tech Lead, mentoring junior developers and coordinating task assignments to ensure efficient project delivery.

Grupo SN

Hybrid

Intern/Junior Full Stack Developer

February 2021 - May 2023

- Developed a tracking and routing system for concrete mixers, significantly reducing company expenses through optimized logistics.
- Led the refactoring of the company's CRM system, improving maintainability and scalability.
- Maintained legacy applications and supported billing systems, ensuring stability and business continuity.
- Promoted from Intern to Junior Full Stack Developer in just 4 months, reflecting strong performance and rapid learning.

Education:

Universidade Federal de Lavras (UFLA)

(In Progress)

Bachelor's in Information Systems

August 2020 - now
